

-CATHERSTON STUD

NOMINATION AGREEMENT FOR CHILLED SEMEN ARTIFICIAL INSEMINATION OF MARES

Terms and Conditions of Acceptance

Our aim at Catherston Stud is to breed top class stock – mares with poor confirmation or known hereditary diseases will not be accepted. The Stud reserves the right to refuse any mare for Artificial Insemination.

Swabs

We would also suggest that you discuss with your veterinary surgeon whether a CEM swab & EVA blood test is required.

Notification

Full co-operation between the mare owner, Catherston Stud and the veterinary surgeon carrying out the insemination is essential. It is important that Catherston Stud is kept informed of the mare's progress and informed as soon as the mare comes into season during the months prior to insemination. The attending veterinary surgeon should contact Catherston Stud to request semen. Morning notification, by 10am for the following day's delivery is extremely important and should this fall over a weekend, Monday or Bank Holiday, early notification is always helpful and can make a large difference to the transport costs. It should be remembered that the Catherston Stallions also compete and therefore any advance warning that you can give will help ensure that we are able to supply semen when it is required.

Transport of semen

The chilled semen will be transported in an "equitainer" which will be sent by Royal Mail Special Delivery or by courier. It should be noted that there is only limited transport by these companies on Saturday, Sunday and Mondays, so a special service may have to be arranged, or the deliveries made one day early. The normal delivery time is 9.00am but a later delivery time can be arranged. We will make every attempt to deliver as requested. Due to the many variables associated with this we cannot, under any circumstances, make promises of delivery date or time, or even promises of availability continually throughout the season. Once the semen is in the hands of the courier it is the property of the mare owner.

Fees

The Stud Fee is payable in full prior to the delivery of the semen, along with the Grooms Fee. Charges for packing and shipping of semen are payable at the point of ordering. Semen will not be despatched without prior payment. We accept Bank Transfers and cash payments only. Our Bank details are as follows: Catherston Stud Sort Code 20-02-25 Account Number: 73450236 IBAN GB59 BARC 2002 2573 4502 36 Please use your surname & the mares name as the reference.

Equitainers

Under normal circumstances a polystyrene equitainer will be used. This is preferable as it is more hygienic and incurs less carriage costs. **The mare owner is responsible for the safe return of the Equitainer and any parts that are missing or damaged will be charged accordingly at £48 per box.**

Collection Expenses & Equitainer hire including consumables	£60 per collection (inc VAT)
Royal Mail Special Delivery (Tuesday – Saturday)	£60 per delivery (inc VAT)
Other carriage / courier services by arrangement.	

Cancellation Fee

25% of the Stud fee will be charged for any nomination not taken up, unless a veterinary certificate is produced stating a valid reason for the mare not being inseminated.

Pregnancy Diagnosis

We recommend that all mares are examined by a veterinary surgeon between 16 – 20 days after insemination to confirm pregnancy and to spot possible twinning. Mares should then be scanned again at 28 days to confirm a heartbeat and should twins have been missed there may be an opportunity to remedy the situation. (It is advisable to scan again at between 42 – 60 days to confirm pregnancy) A further pregnancy confirmation should be performed in the last week of September and Catherston Stud notified of the result.

Covering Certificates

All certificates will be forwarded to the mare owner on receipt of a Positive Pregnancy Diagnosis certificate after the 1st October.

No Foal 1st October 20% Fee – Chilled semen only

If an artificially inseminated mare is certified not in foal by 1st October the stud fee will be returned less 20% which will be retained by Catherston Stud or a Free Return for the next season. If a covering certificate has been issued then the stud fee will only be returned to the mare owner on receipt of the covering certificate.

Embryo Transfer

Embryo Transfer is a very expensive and risky method of breeding, putting the embryo at great risk by being implanted into a recipient mare. Very few veterinary practices are truly successful in this procedure. Please see the specific Nomination Agreement for Embryo Transfer using Catherston Stud Stallions.

Any semen ordered must be used only for traditional artificial insemination into a single nominated mare who carries the foal and not for embryo transfer, ICSI, or any other reproductive procedure of any nature whatsoever.

If you carry out an unauthorised use of the semen or flushed embryos or in any breach the paragraph above, then a contractual penalty of £5,000 will be due in all cases. This in addition and without prejudice to any other right or remedies available to us.

Mares in foreign countries

Frozen semen has been exported from certain stallions. We have agents in USA, Australia and New Zealand and contact details can be obtained from Catherston Stud. For other countries, full details need to be forwarded to Catherston Stud who will arrange for West Kington Stallion Centre to deal with further arrangements at the Mare Owners expense. There is a separate contract for Frozen Semen.
